

**ACE Training and Consulting offers the:**

## **Advance Diploma in Health, Safety and Environment**

The Advance Diploma in Health, Safety and Environment provides an introductory and intensive foundation level course that builds a strong base for individual learners who want to start a career in the field of occupational health and safety. The course is a blend of theory and practical, giving in-depth knowledge and practical orientation to understanding the standards and getting them implemented in the workplace.

In today's workplaces, whether public or private, it is absolutely essential to have a safety department employing people training in identifying hazards and conducting risk assessments. The Advance Diploma in Health, Safety and Environment course is the best introduction to workplace health, safety and environment risk that is relevant to all industry sectors.

The course covers, industrial safety, construction safety, fire safety and general safety based on strong risk assessment principles.

The course content is delivered in an understandable and easy way and will help you to:

- gain a basic understanding of the management of health and safety.
- gain awareness of common workplace safety and health hazards so you can help to implement or maintain your organisation's health and safety management system
- gain practical skills that can help keep yourself and others safe
- apply the principles of risk assessment
- help to improve a positive health and safety culture in your workplace.

### **Who is it for?**

Anyone who needs to understand the principles of health and safety as part of their job will benefit from taking this qualification. The course provides a valuable overview, which can act as a sound basis for further study.

**This course can be your first step towards a rewarding career in the field of health and safety.**

### Benefits to learners:

- The course is a perfect foundation to Health and Safety knowledge for beginners
- The course provides the ability to inspect the workplace, recognize a range of common safety and health hazards, evaluate risks (taking account of current controls), recommending further control measures and assigning actions.

### Benefits to employers:

The Advance Diploma in Health, Safety and Environment course makes your staff competent. This can help you to:

- Reduce incident and injury rates, and the associated lost time and absence
- Foster greater health and safety awareness amongst employees
- Improve employee engagement and enhance safety culture
- Secure higher levels of compliance with organisational safety measures

### What does this qualification cover?

The course consists of 3 units:
